Peace To Far Off Places

© Jenny Lester (SOCAN / BMI) 4/4 time Key of A ♭ written in G capo 1ST fret

Verse 1

```
      G                                        C                    G
Uncle Sam you've got the upper hand can you stop the world from cryin'
                                              D
In a veil of tears we shed our fears for the thousands who are dying
          G                                          C              G
It's been round and round and round and round in the name of many faces
                                                   D              G
Can we change today to find a better way and find peace in far off places
```

Verse 2

```
          G                              C          G
I'm not sayin' I'm the fearin' kind but I believe in praying
                                          D
It don't matter who you're talkin' to it's the words that you are sayin'
         G                                   C                G
Can we fold our hands try to understand the creeds and all the races
                                                D              G
Can we change today to make a better way to bring peace to far off places
```

Verse 3

```
      G                                          C                  G
It's a cold dark day that has come our way it has crossed the line of evil
                                                      D
Does our fabric share the same threads we bare in the actions of some people
          G                                              C            G
It's been round and round and round and round in the name of many faces
                                                    D                  G
Can we change today to make a better way and bring peace to far off places
```

Verse 4

```
         G                                          C                    G
Let the bells ring loud or hold your flag up proud at home and across the water
                                                 D
Does the vigil turn while the candles burn to the innocent sons and daughters
       G                                  C          G
It's a burning fire, hope and desire the soul of man embraces
                                                   D                G
Can we change today to find a better way and make peace with far off places
```
